DETAILED ACTION

Allowable Subject Matter

Claims 14-15, 38 and 40-52 have been renumbered as 13-28 respectively.

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

Hirata et al, US Patent No. 5,150,365, discloses a LAN communication system for coexistent base band and broadband signals. Okazaki discloses "A Transmitting and Receiving Method for CDMA Communications Over Indoor Electrical Power Lines". Both Hirata and Okazaki do not teach or fairly suggest the following features, which are recited in each independent claim of the present application:

1. A local area network within a building for transporting data among a plurality of data units, the local area network comprising at least one wired segment and at least one non-wired segment, wherein said at least one wired segment includes:

- (a) at least one electrically-conducting line;
- (b) at least two outlets; and
- (c) at least one wired modem coupled to said electrically-conducting line, operative to communicate over said electrically-conducting line; and wherein said at least one non-wired segment is operative to communicating data without electrically-conducting media and includes at least one non-wired modem, wherein at least one of said outlets couples a wired segment to a non-wired segment, and wherein said at least one electrically-conducting line is furthermore operative for concurrently distributing a service other than the transport of data communication signals; and wherein said non-

Art Unit: 2667

wired segment is furthermore operative to communicating data by sound as recited in claims 1 and 26.

2. An adapter module for use in upgrading existing wiring of a building so as to support a local area network having at least one wired segment coupled to an outlet and at least one non-wired segment, the adapter module comprising:

means for detachably electrically and mechanically coupling the module to the outlet;

at least one non-wired modem operative for transporting signals to and from said wired segment, when said module is coupled to the outlet, over said at least one non-wired segment, and

at least one wired modem for transporting data communication signals over the at least one wired segment to enable the at least one wired segment to concurrently distribute data communication signals and a service other than data communication signals, and the services is one of a telephone service, an electrical power service, and a cable television service as recited in claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
